

Scary HTML

Warning: You are about to edit HTML. If done successfully, you may be considered a little bit geeky.

```
<!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN"
"http://www.w3.org/TR/html4/loose.dtd">
<html>
<head>
<meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
<title>Untitled Document</title>
</head>

<body>
<a href="http://www.spire2.com"></a>
</body>
</html>
```

1

Put your web address here. Your graphic will link with your site. If you don't want your graphic to link to your site, just delete "href="http... spire2.com">"

2

This is where your graphic is hosted. If you don't know how to get a graphic on your site, send your graphic to jjames@spire2.com and I will drop it on my site and host for you for no charge. I will send you back the link to replace the copy shown above.

3

This is alternative text that would appear if your image gets blocked. Replace with your contact information. The funky codes between some of the information ("•") will create a bullets (don't tell anyone, but you just learned some HTML coding).
